

A perfect interplay

ASSA ABLOY

Single-source solutions for everything having to do
with doors

Experience a safer
and more open world

The ASSA ABLOY Group

is the world leader in access solutions. Every day we help people to feel safer and more secure and to experience a more open world.

ASSA ABLOY
(Schweiz) AG

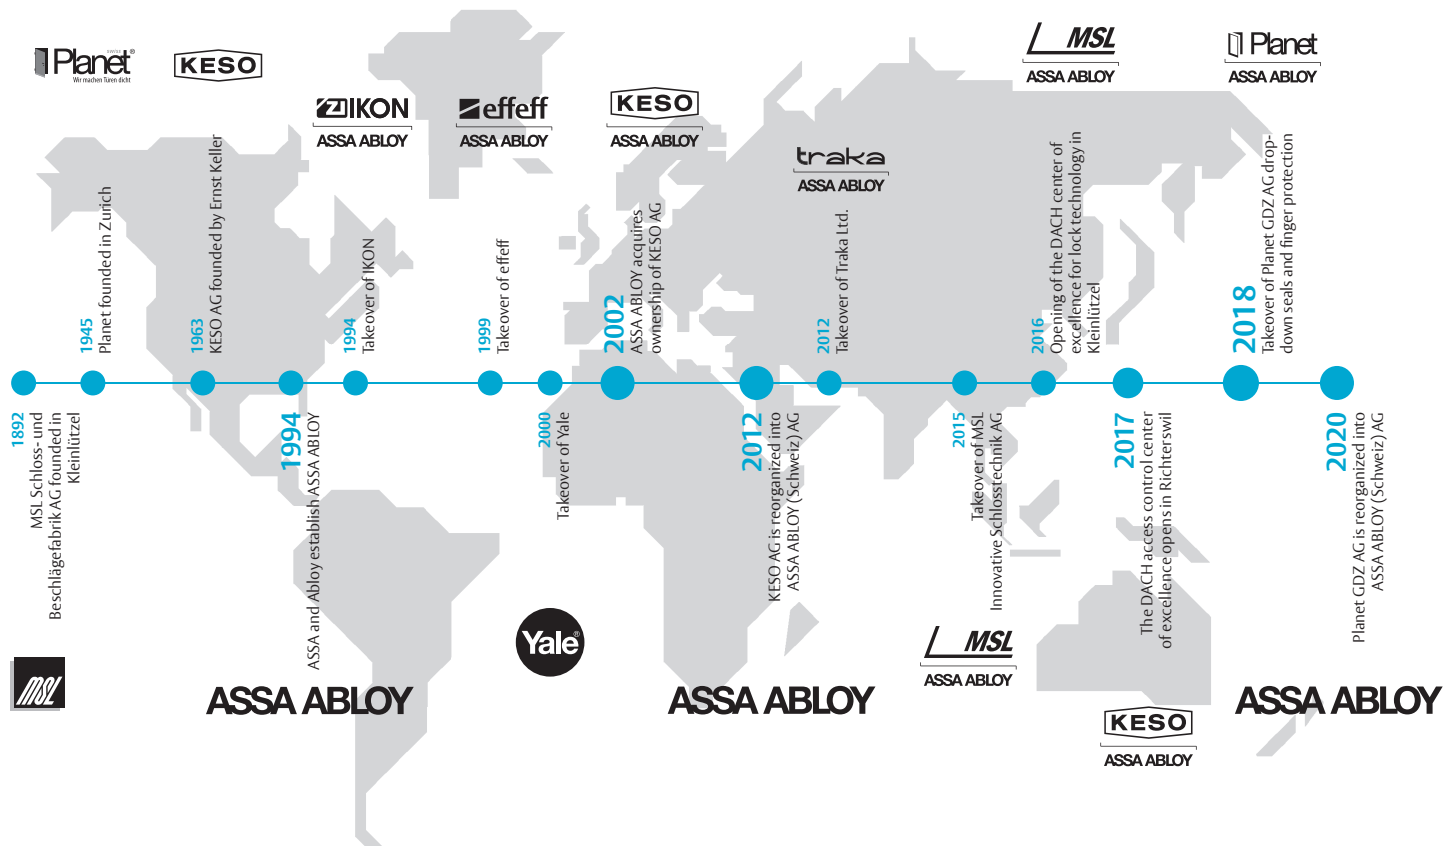

ASSA ABLOY is the world's leading manufacturer and supplier of locking and security systems for everything having to do with doors. Our goal is to meet the high standards of our customers with regard to security, protection and user friendliness. With over 660 leading brands in over 70 countries, we develop, produce and sell products and services for the construction sector and OEM customers. With a turnover of around 8 billion euros and more than 47,000 employees, ASSA ABLOY is the world's largest provider of solutions for everything having to do with doors.

ASSA ABLOY represents and markets in Switzerland the well-established brands KESO, MSL, Planet, Yale and effeff. At the production site and headoffice in Richterswil, we develop and manufacture the ground-breaking KESO locking systems with the highest precision. With more than 350 patents, KESO represents both innovative locking systems as well as the most secure cylinders, combined with a locking concept design that is unique in the world.

At the production site for lock technology in Kleinlützel, security locks are developed and manufactured with trademark Swiss quality. Also located at this site since the end of 2016 is the lock technology center of excellence for Germany, Austria and Switzerland. The MSL brand stands for innovative lock technology. At this location, ASSA ABLOY produces security, panic and electromechanical mortise locks as well as multi-point locking systems.

For more than 70 years, Planet GDZ AG has been producing drop-down seals, which seal doors without thresholds. The comprehensive Planet finger protection range was launched in 2016. The company with its head office in Tagelswangen, Zurich was taken over by ASSA ABLOY in August 2018.

Thanks to the option of supplementing all products with additional products from the Group, we can offer a well-balanced product line that literally and figuratively opens doors for our customers.

When production gets closer to you

Whether building owner, architect, technical planner, general contractor, processor, wholesaler or retailer – at ASSA ABLOY customised support is our highest priority.

Benefit from the expertise of your personal contact in every phase of the property life cycle. Together with our experts, solve all pending tasks and challenges.

Building owners, architects, technical planners and general contractors...

...will be taken care of by our property consultant team, which focuses on sustainable overall solutions. After a thorough needs assessment, we will support you in the design and creation of door and locking concepts.

The jointly defined services will then be gathered into the format required by the market. After the conception phase is completed, the property consultants will take on a coordinating role between architects and planners as well as the contractors implementing the work.

Wholesalers...

...will be taken care of by our wholesale consultants and portfolio managers. This experienced team provides support in the area of inventory and port-

folio management and offers training sessions for product innovations. This ensures that the wholesale partners are always up-to-date.

Retailers...

...can rely on our experts from the technical consultant team. They will be accompanied by our technical consultants over the entire duration of the project.

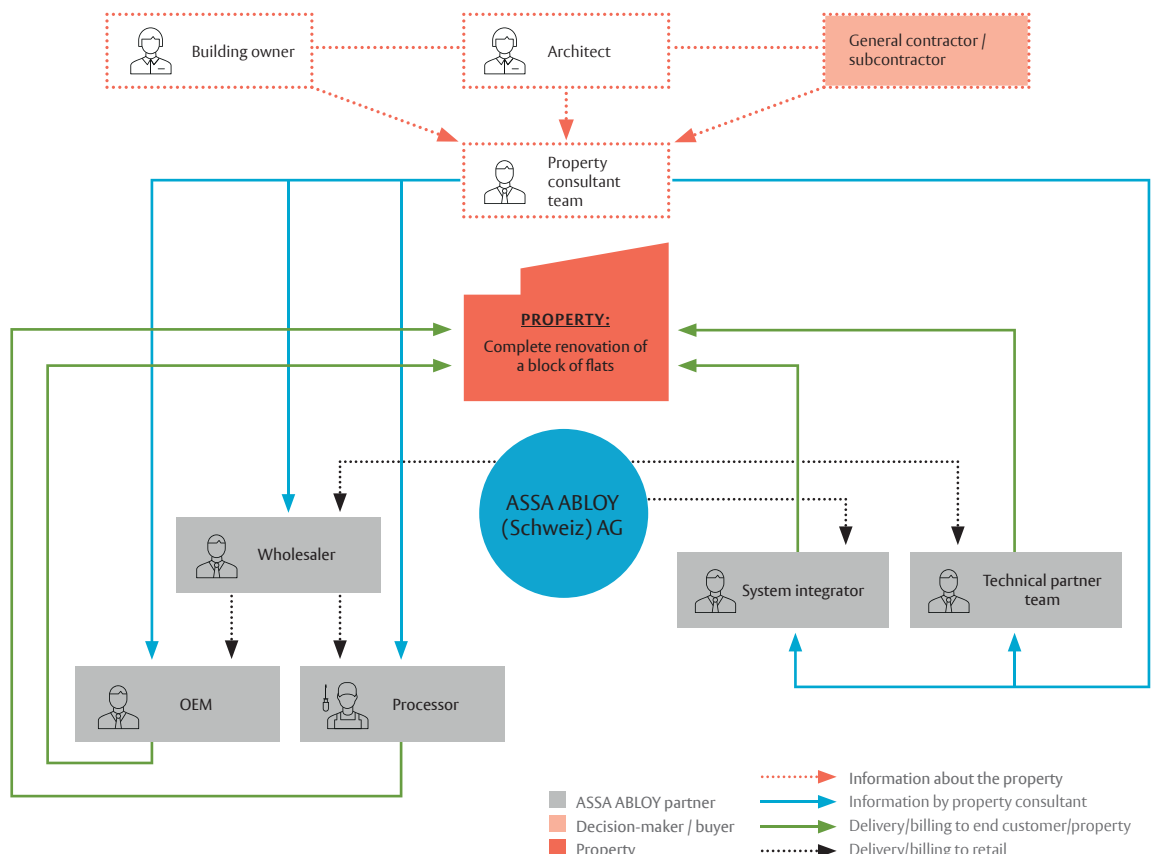

We will be at your side supporting you both technically and commercially from the submission phase through to the implementation and start-up of your project.

Window/door manufacturers, metalworkers and carpenters...

...can contact our experts from the processor team in case of any challenges relating to anything having to do with doors. Whether there are questions about products, need for support during the implementation of the projects or technical support with the installation and start-up of our products.

In the thick of property business:

Our ASSA ABLOY experts will accompany you during the entire property phases and support you with relevant know-how precisely where interfaces occur.
